

FIG. 1 is a perspective view of a hand-held power tool, such as a reciprocating saw. The tool includes a handle assembly (10) with a trigger switch (12) and a lock-off switch (14). A motor housing (16) is connected to the handle assembly. A reciprocating blade (18) is mounted to the motor housing. The blade has a cutting edge (20) and a back edge (22). A guide shoe (24) is mounted to the blade. A guard (26) is mounted to the handle assembly. A trigger switch (28) is mounted to the handle assembly. A power cord (30) is connected to the motor housing. A connector (32) is mounted to the power cord. A plug (34) is mounted to the connector. A switch (36) is mounted to the handle assembly.
